

MathFLIX CHALLENGE

Water

Use the information from the following table to represent all of the water in the water cycle on the 10×10 grid and the circle graph.

Where's Our Water?

97% is salt water in the oceans
2.3% is in solid form in the polar ice caps
0.4% is underground water
0.2% is in lakes and rivers
0.1% is in the soil and the air

Color

green
blue
yellow
red
black

Use the inequality signs ($<$, $>$) to make the following statements true.

Salt water in the oceans

fresh water in lakes and rivers

Solid water

fresh water in lakes and rivers

Water in the soil and air

fresh water in lakes and rivers

Ocean water

all other water in the world
